Role Designation : Software Quality Engineer

Summary

- Around 4+ years of professional Experience in Software Testing with an emphasis on testing Client-Server and Web-based application.
- Worked on projects in agile methodology.Part of sprint planning, daily scrum, sprint review, sprint retrospective, and product backlog refinement meeting.
- Rich experience in Telecom domain the full cycle of the design, planning, implementation, operation, testing.
- Strong experience of Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC).
- Experienced in Automation testing of Web Application using Junit, TestNG, Cucumber, Maven
- Knowledge of various testing frameworks and ability to design, build, and maintain scalable test automation frameworks.
- Designed and implemented automated testing frameworks using Selenium and Java, improving test case execution speed by 40% and reducing manual testing efforts by 45%
- Implemented a fully functioning framework that ran over 4500 regression tests that identified 27 major defects within large data volumes at an early point.
- Expertise in Manual Testing of Web Applications which is developed using technologies like Java
- Expertise in Designing and Execution of Test Cases and Tracking Defects in Bug Tracker Tool.
- Expertise in performing different types of Testing: Black Box Testing -Functional Testing, Regression, Integration, Sanity, Smoke, etc.
- Closely worked with development teams investigating and correcting software bugs and deficiencies based on the testing result.

Key Domain and Technical Knowledge

- Domain : Testing
- Technical : Automation testing, Manual testing

Academic Qualification

Sr.No	Qualification	University	Year	Per %
1	SSC	Maharashtra State Board of Secondary and Higher Secondary Education	2014-15	76
2	Diploma-Mechanical Engineer	MSBTE	2015-19	68.35
3	BTech – Mechanical Engineer	Dr. Babasaheb Ambedkar Technological University	2019-21	08.44

Total Work Experience: 3+ Year

Company: Infosys Limited

Projects – 1 (April 2022 – May 2023)

Project Title: Telstra Ltd.

Description: Worked as Manual + Automation test engineer

Application: Workday HCM, UKG

- **Client:** Telstra
- **Team Size:** 07
- **Role:** Senior Business Analyst
- **Tools Used:** • **Tools Used:** Selenium (Java), Cucumber, Junit, TestNg, Jira, Git, Amazon Q AI.

Role and Responsibilities: •

- Worked on Workday business Process and automated like Hire, Rehire, Transfer, Job change, Payroll change, Create position etc.
- Worked on terminations/Leave like Sick leave, Suspension leave, Toil leave edit, updating workday and with the changes.
- Tested several business processes for security configuration for initiate and approval processes.
- Closely worked with dev team to FastTrack the issue.
- Automated the applicants, hiring applicants into supervisory organization. Proposed compensation for new hire, design business process to hire and employee.
- Automated Benefits, payroll, absence and time off, time tracking, compensation, Job, personal, performance etc fields. Automated 120+ TCs in Workday Application
- Creation of automation scripts using Selenium Java.
- Identifying the elements with different locators like ID, XPATH etc. Involved in Automation using IntelliJ, Java, Selenium WebDriver jars.
- Configured Selenium WebDriver, BDD Cucumber, Maven tool and created selenium automation scripts in Java.
- Automation Tester with experience leveraging AI-powered tools like Amazon Q to accelerate test automation development, script optimization, and debugging, reduce scripting effort, and enhance test coverage.
- Experienced in integrating AI-driven coding assistance into Selenium/TestNG automation frameworks for faster delivery and improved code quality.

Projects – 2 (June- 2023 – till now)

Project Title: BT Openreach

Description: Application: Oxygen, Taskforce, CSS, Sabor, AIB +21 other Components

- **Client:** British Telcom (UK client)
- **Project Role:** QA Automation + QA Manual Tester
- **Team Size:** 12
- **Tools Used:** Amazon Q AI, Selenium (Java), Cucumber, Junit, TestNg, Jira, Git, Confluence Document, Camunda Framework.

Role and Responsibilities:

- Creation and update of Test Plan and Test Strategy for the project;
- Participation in QA daily meetings and Stream daily meetings, calls with customers, grooming/planning sessions, sprint reviews, showing demos for customers, retrospectives.
- Automation Tester with experience leveraging AI-powered tools like Amazon Q to accelerate test automation development, script optimization, and debugging, reduce scripting effort, and enhance test coverage.
- Experienced in integrating AI-driven coding assistance into Selenium/TestNG automation frameworks for faster delivery and improved code quality.
- Analysis of requirements according to the project specifics and backlog refinement; Analysis of user stories, Execution of automation scripts
- Main responsibilities: Requirements analysis, defects reporting, reports: daily status, test report. Finding code error/bug from 21+ component and raise a bug
- Acquainted with different test design techniques, worked with such tools as Jira.
- Reported found defects, verified fixed issues. Involved in Automation using IntelliJ, Java, Selenium WebDriver jars.
- Configured Selenium WebDriver, BDD Cucumber, Maven tool and created • selenium automation scripts in Java.
- Testing types used: black-box, functional, sanity, smoke, regression. Participated in daily SCRUM meetings, design walkthrough with developers Participated in daily SCRUM meetings, product refinement meeting, product design meeting, design query meeting, design implementation meeting
- Communicated with customers to clarify discrepancies between provided content and implemented features for production websites, review TDA document from POs directly.
