PROFESSIONAL EXPERIENCE

Infosys

Feb. 2024 – Present

Specialist Programmer

Mangalore, KA

- Working as **Java backend developer** for **Apple** Inc's global point-of-sale application.
- Restructured DB transaction scope to exclude Json serialization, reducing connection hold time by around **80%** and eliminating connection pool starvation risk under concurrent load
- Implemented priority flow for Apple's connect & personalize feature reducing **loading time from ~6s to ~3 s.**
- Spearheaded Brazil tax refactoring implementing **strategy pattern** across multiple classes reducing **technical debt 75%** and **complexity 60%** with zero functionality impact. (self-initiative)
- Delivered a major in-store services feature for Apple's retail POS (online/real time system) system enabling service item sales with free trial subscription integration (**created abstract processor for dynamic linking**), while simultaneously resolving multiple production issues including AirPods offer display and subscription processing errors.
- Designed and deployed backend services for integrating user-facing applications, implemented data consolidation and filtering logic to enhance data relevancy and reduce client **payload by 30%**
- Separated business logic with xml generation logic (separation of concern) and increase code adherence to **SOLID** principles.
- Collaborated with cross-functional teams and QA teams to maintain and enhance critical business logic for global retail operations
 - **Skills:** - Java, Microservices Oracle SQL, Git/GitHub, Docker (Basic), Maven, Gradle, Swagger, Open API, SonarQube, Splunk, Spinnaker, Rio CI/CD, Vessel, JUnit, Mockito, REST/SOAP, Claude Code.

PROJECT

Apple-Zon

- **Architected a distributed** e-commerce platform with **6 spring boot microservices** using feign client, and **Redis caching** for high-performance data access with **flyway migration**.
- Implemented **async event driven order workflow** using RabbitMQ Topic exchange with dead letter queues, decoupling order->notification flow.
- Built full **observability stack** with micrometer distributed tracing (Zipkin, MDC context propagation) and **ELK** pipeline for centralized log aggregation with correlated traceId across all services
 - **Skills:** - Spring Boot, Hibernate, RabbitMQ, Flyway Migration, Redis, Java, SQL, Docker, Gradle, Swagger, Micrometer, Zipkin, ELK stack, React, Elasticsearch, Junit 5

EDUCATION

ABES Engineering College

2019-2023

Bachelor's in technology (Computer Science)

Ghaziabad, UP

- Strong fundamentals in Data Structure, Algorithms, Database Management System, OOPS, OS, CN
- Passed Graduate Aptitude Test in Engineering

CERTIFICATIONS, SKILLS & INTERESTS

- **Certifications/Achievements:** AWS Certified Cloud Practitioner (2025), GATE CSE Qualified (2024), Global Rank 987 in Google Kickstart Round H 2021, Knight@Leetcode.
- **Skills:-** Apache Kafka(Basic), Data Structures, Algorithm, OOPs, Low Level Design , System Design (Basic) Test Driven Development, NoSQL databases, PostgreSQL, RESTful APIs, SDLC
- **Interests:** Gym, Swimming
