SUMMURY:

.NET and Angular Developer with 3 years of experience in designing, developing, and maintaining scalable web applications. Strong expertise in ASP.NET Core, C#, Web APIs, Angular, and SQL databases, with a solid understanding of RESTful services and MVC architecture. Proven ability to build responsive UI, integrate backend services, and optimize application performance. A quick learner and collaborative team player focused on delivering high-quality, secure, and user-centric solutions.

EXPERIENCE:

Full Stack Developer

Western Ocean Software Solutions:

Jan 2023 – Present

- Developed and maintained web applications using **ASP.NET Core, C#, Angular, and SQL Server**
- Built REST APIs and integrated them with Angular front-end
- Worked in Agile teams, handled bug fixes, and improved application performance
- Worked with SQL Server for database design, queries, and performance optimization • Used Entity Framework for data access and migrations

SKILLS:

Languages: C#, .NET, JavaScript, TypeScript, Angular, LINQ, Ajax, JQuery, JWT, Authentication and Authorization

Framework: .NET Core, ASP.NET MVC, Entity Framework

Database: MySQL, SQL Server, Stored Procedure, Trigger's, Jira

Tools & IDEs: Visual studio, VS Code, Git, Jenkins, Postman, Swagger

Cloud: Azure DevOps, CI/CD Pipeline

Methodologies: Agile, Scrum

Architecture AND Concepts: MVC, Clean Architecture, REST API Integration,

SOLID Principal, Microservices, Web API

AI Tools: ChatGPT, Gemini, Copilot

PROJECTS:

Fin Nova:

Overview: Fin Nova automates core banking operations with secure transaction processing, account management, and financial reporting.

- **Tech Stack:** ASP.NET Core Web API, Angular, SQL Server, Entity Framework Core, JWT Authentication, Angular Material, Chart.js, Auto Mapper, Git, Azure
- Developed a secure digital banking application using .NET Core Web API, Angular, and SQL Server, enabling customer onboarding, account management, and fund transfers.
- Implemented JWT-based authentication, role-based access control, and transaction processing using Entity Framework Core.

Claim Ease Healthcare:

Overview: Claim Ease automates hospital billing and insurance claim processing with secure workflows, real-time tracking, and financial reporting.

- **Tech Stack:** ASP.NET Core Web API, Angular, SQL Server, Entity Framework Core, JWT Authentication, Angular Material, Chart.js, Auto Mapper, Git, Azure
- Developed an automated hospital billing and insurance claim processing system to streamline charge calculation, GST computation, and approval workflows.
- Implemented secure REST APIs with JWT-based authentication and role-based access control.
- Built responsive Angular dashboards for claim tracking, revenue analytics, and financial reporting, improving billing accuracy and claim processing efficiency.

Centralized Inventory & Stock Automation System for E-Commerce:

Overview: A centralized e-commerce inventory system designed to automate multi-warehouse stock tracking, transfers, and audit logging with real-time visibility and secure role-based access.

- **Tech Stack:** ASP.NET Core Web API, Angular, SQL Server, Entity Framework Core, JWT Authentication, Angular Material, Chart.js, Auto Mapper, Git, Azure
- Developed a centralized inventory and stock automation system to manage multi-warehouse product tracking, stock transfers, and real-time inventory updates for an e-commerce platform.
- Implemented secure RESTful APIs using ASP.NET Core with JWT-based authentication and role-based access control.

EDUCATION:

B.Tech in Computer Science

(Mumbai University)
